Cleaning

## Cleaning Agent for Trashed & Grungy Tile or Concrete Floors

GRUNGESLAYER is a powder prespray agent to be applied on neglected tile and concrete floors that have a high level of grunge, soil and grease build-up. It slays the grime and restores the floor to a clean and shiny condition.

### Slay Grungy and Soiled Floors

**GRUNGESLAYER is a powder prespray agent to be applied prior to cleaning with a hard surface extraction wand or tool**

- GrungeSlayer works to effectively as a powder prespray or as a booster/additive to clean and restore neglected tile or concrete.
- Works best using a rotary agitation hard surface tool

#### Directions:

1. Read entire label before using. Use only as directed. Always pretest surface with cleaning solution for color-fastness prior to cleaning. Ensure work area is well-ventilated during application. Keep children and pets out of the area during application and drying. GRUNGESLAYER is not recommended for cleaning natural stone floors.
2. This product is ultra-concentrated. For normal soiling, mix 2 ounces of GRUNGESLAYER powder with one gallon of warm or hot water into a professional sprayer. For extreme soiling, mix three to four ounces of powder with a gallon of warm or hot water into a professional sprayer. For application through a Inline Injection Sprayer, mix 12 oz. of powder and fill container with water. Use 4:1 dilution.
3. Apply mixed solution with sprayer evenly and liberally across surface to be cleaned. You can use a pump-up sprayer or a battery powered sprayer. If preferred, you can apply mixed solution with a damp mop, sponge, or other appropriate professional equipment. If using a mop for solution application and surface cleaning, change your mop water often to make sure that soil is not re-deposited.
4. Allow for 3 -5 minutes of dwell time. For concrete, if stains have been deeply absorbed, allow longer dwell time so the solution has time to reach into the concrete pores and crevices.
5. Allow the surface to dry

For use as a carpet cleaning solution booster/additive:

1. Mix two ounces of GRUNGESLAYER with each gallon of mixed prespray (traffic lane cleaner, preconditioner) solution. This mixture is not recommended for wool carpeting or residential nylon carpets that are being properly maintained.
2. Always pretest surface with boosted cleaning solution for color-fastness prior to cleaning.
3. Proceed to apply the prespray and continue cleaning in accordance with the directions of the prespray.

Available in: 6.5# jar, 4packX6.5# jar

Part # 950-156
