& Upholstery

One-Part Red Stain & Colored Beverage Stain Remover

RedBreak 1 is a revolutionary breakthrough in stain removal science. Utilizing reducing and polymer technology, Red Break 1 alters the structure of difficult stains by removing them or making them invisible.

Red Break 1 is a one part system that requires no mixing and no waste of product. The perfect carpet prespray for filthy, trashed, and neglected carpeting.

- No more mixing solutions and then throwing away your valuable product. Red Break 1 is designed to remove stains caused by any food or beverage with color added.
- This product is safe and effective on virtually any stain caused by a common household food or beverage spill and is recommended only for use on synthetic carpet fibers. Red Break 1 is designed for use by trained cleaning professionals. It often works simply by applying solution directly to the stain. For stubborn stains, the application of heat as an accelerator can enhance the treatment process.
- Ideal for commercial carpets and rental units.

Directions:

Please read the full label directions before cleaning.

1. This product contains reducing bleaches which can remove color from some fibers, carpets, or fabrics. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. Clean the stained area with normal cleaning processes prior to the application of this product. Take an extra dry vacuum pass to remove as much moisture as possible.
3. Red Break 1 is a one part solution. Liberally apply solution straight to the stained area.
4. Allow 30 seconds to 2 minutes of dwell time. Many stains are removed simply by extracting the area with clear water at this point.
5. If residual discoloration remains, reapply solution liberally straight directly to the stain.
6. Accelerate activity with heat. If using a low pressure, high volume steam generator such as a wallpaper steamer, simply allow steam wand to sit on treated area. Check stain periodically every 30 seconds to 2 minutes. If using a steam iron, cover stained area with a wet white, colorfast cotton towel. Apply steam heat from iron set at the lowest steam temperature. Lift and move the iron every 20-30 seconds and check the area.
7. When the stain has completely disappeared, simply extract the area with clear water. If a slight yellow discoloration remains, simply allow the area to completely dry and the discoloration will usually go away.

Available in: 1 Quart; Case of 12 x 1 Quart
Part # 950-247
