Extreme Performance Gelled Solvent Oil Based Spot & Stain Remover

SpotMaster Gel XP is a gelled solvent-soluble spot and stain remover for inks, markers, paint, nail polish and more.

HydraMaster has formulated the solvent soluble spot and stain removing power of a volatile solvent, non-volatile solvent, and POG into one specialized thickened, gelled solution with SpotMaster Gel XP.

- Designed to effectively remove or lighten all kinds of stain causing inks (ballpoint, duplicating, ink jet, stamp pad, permanent marker, and more) along with latex, enamel, spray, and other types of paints.
- Breaks down oxidized grease and oil spills, and removes or lightens stains caused by shoe polish, nail polish, cosmetics, and tar.
- Spotmaster Gel XP is formulated to be in compliance with the latest VOC emission regulations, and is fast acting, stays on the surface of the spot, and is safe on most natural and synthetic fibers (Do not use on acetate upholstery fibers).
- The gelled solution sits on the spot rather than immediately absorbing down into the carpet like a typical solvent spotter does.

Directions:

Please read the full label directions before cleaning.

1. Pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. Remove any excess contamination before applying spotter. For spilled liquids, blot or extract up. For encrusted materials, use spotting spatula to remove as much material as possible.
3. Poke holes in the top of the material with the sharp end of a spotting spatula. Apply SpotMaster Gel XP straight to the spot or stain using your flip top applicator, keeping the gelled material on top of the spot or stain.
4. Allow to dwell 2-3 minutes.
5. Agitate solution into the contaminated area with your spotting spatula or tool.
6. Blot up as much of the stain as possible with a colorfast, cotton, absorbent towel. Consider using a tamping brush with towel to force as much of the material as possible into the towel. Repeat process so long as color transfer into absorbent towel is obvious.
7. Rinse with water and blot up or extract area thoroughly.
8. SpotMaster Gel XP will effectively eliminate most solvent and oil based spots and spills. However, If discoloration, apply Knock Out 1 according to directions.

Available in: 1 Quart; Case of 12 x 1 Quart
Part # 950-251

Product cannot ship via air freight
