Made in the USA

BOXER 318HP

www.hydramaster.com | 800.426.1301 | 425.775.7272

There is 30% less carpet in the homes you are cleaning now than 5 years ago.

What are you doing about it?

Break Down of a typical home today compared to one 5 years ago. (i.e. - 2400 Sq. Ft. Home)

5 Years Ago	Today
72.2% Carpet	55.5% Carpet
1,733 Sq. Ft. @ 30-50 cents/sq ft	1,332 Sq. Ft. @ 30-50 cents/sq ft
Total Billed: \$520-\$867	Total Billed: \$399-\$666
No Hard Surface Cleaning	38.2% Hard Surfaces
	916 Sq. Ft. @ .65 - \$1.5 Sq. Ft.
	Added Revenue: \$595 - \$1,374

Earn \$200-\$400 dollars per hour or more!

Floor Covering Percentages Today:

- Carpet:** 55.5% of square feet
- Ceramic Tile:** 12.6% of square feet
- Stone:** 5.9% of square feet
- Resilient:** 19.7% of square feet

Restorative Tile and Grout Cleaning

Tile and grout cleaning is one of the number one "add-on" services in the industry right now. You are typically getting three to four times per square foot or more over what you charge for carpet and many times tile is easier to clean than carpet. Adding a few simple tools such as the RX-15H, you can immediately turn your truckmount into the most efficient tile and grout cleaning machine available with your Boxxer 318HP and the full line of restorative cleaning solutions from CleanMaster, you'll be able to clean even the grimeiest tile & grout.

Restorative Finished and Polished Concrete Cleaning

Concrete has become the new material of choice in flooring for designers and homeowners across the United States. Concrete floors in stained, stamped, polished, colored, painted, and personalized glory are popping up in retail stores, trendy restaurants, offices, and homes everywhere. The growth of stamped concrete floors that are designed to look and appear like natural stone has been exponential. In other words, concrete floors aren't just at your local big box store or home improvement center any more. They are even "chic" in high end residential homes.

Restorative Stone Cleaning

Stone is the fastest growing floor, countertop, and shower stall covering in the residential market. From stone floors such as marble, travertine, slate or flagstone, to granite countertops to bath and shower stalls, your customers have stone in their homes and are in need of someone to professionally maintain it. Commercial settings for stone floors and countertops are another incredible profit earning opportunity.

Many professional cleaners shy away from stone care because they fear it is too difficult. The truth is, with the proper products and procedures, it is one of the easiest and most profitable services you can add to your business. A small up front investment can get you started on your way to earning \$200-\$400 dollars per hour or more.

Can't you just sweep up and mop concrete?

The answer, just like it has turned out to be with ceramic and stone floors is, "not if you want it look very good." Don't all those large commercial buildings just use an auto-scrubber with the right pads to clean all that concrete? The answer may be yes, but once again, they may not be as clean as they appear. Concrete does need a professional restorative, deep cleaning with the cleaning power you are just not going to get out of a mop and bucket system or even the most sophisticated auto-scrubber. With its porous nature and sometimes uneven surface, you quickly find out that soil and oil can build up in the cracks and crevices rapidly, particularly in stamped concrete. With all this concrete going down everywhere, and fancied up every way you can imagine,

a quick simple demo will reveal right before your customer's eyes just how dirty and filthy their concrete floors have become. Professional Cleaning or Restoration Contractors equipped with the Boxxer 318HP and the RX-15H Rotary Hard Surface tool have the most efficient way to clean and restore the finished look of treated, polished, or stamped concrete floors. Add to that fact that the waste water handling and collection ability of your Boxxer 318HP truckmount is becoming an environmental necessity outdoors, and is almost a requirement indoors for the deep cleaning of concrete surfaces. With your CleanMaster restorative cleaning solutions designed for concrete, you are ready to go.

BOXXER 318HP

The Boxxer 318HP is a dedicated hard surface cleaning and pressure washing truckmounted extractor designed specifically to provide heated water at pressures up to 1500 psi, yet affordable enough to start your business or add to your carpet cleaning fleet. With the residential market share for carpet as a floor covering having fallen by 25-30% in the last 5 years, the market for restorative cleaning of tile, stone, and concrete floors is growing larger every year.

The Boxxer 318HP is equipped with several exclusive features which make it ideal for dedicated hard surface cleaning. First, the chemical solution pump is constructed of stainless steel (Most truckmount chemical solution pumps are brass) with an integrated shut-off valve to deal with the higher pressures typically associated with hard surface cleaning. Secondly, a specially engineered heater coil is used to withstand the rigors of constant high pressure cleaning applications (up to 1500psi.) Finally, keeping the hot water flowing (180-210°F) even at higher pressures allows you to take advantage of the cleaning power of hot water to reduce chemical usage.

The Boxxer 318HP provides you with pressure washing capabilities, but with the powerful 3006 Competitor SL Vacuum Blower, you have waste water recovery capabilities no pressure washer has. The powerful 1500 psi pressure is complimented by the fact the water is heated without using a secondary fuel source. Combined with the cleaning power of a rotary extraction cleaning wand like the HydraMaster RX20 or RX-15H, or a stationary hard surface wand, you have the capabilities to restoratively deep clean even the dirtiest grout lines in a stone or tile floor, without having to use labor intensive brushes. Keep in mind though, the Boxxer 318HP is fully capable of performing a high quality carpet cleaning job, meaning you never have to turn down any potential work. The Boxxer 318HP comes standard with the HydraMaster RX-15H rotary hard surface tool meaning you are equipped and ready to clean on day one.

BOXXER™ 318HP

Specifications and Features

Machine Specifications:

- Dimensions: 24"W x 31"H x 36"D
- Weight: 570 lbs
- Ignition: Electric key start
- Chemical System: last-step chemical injection, meter controlled
- Heating System: Finned tube heat exchanger with stainless steel tubes. 210°F
- Wand Capacity: Single
- Fuel Consumption: 1.0 gph
- Uses: Residential and Light Commercial

Standard Equipment:

- RX-15H Rotary Hard Surface Cleaning Tool
- Runtime hour meter
- Chemical flow meter (0 -10gph)
- Solution Hose Length: 100ft X 1/4" High Pressure hose
- Chemical flow control valve
- Vacuum Hose Length: 100 ft x 2"
- 5 gallon chemical jug
- Wand Whip Line: 10 ft, 1.5"
- Vacuum gauge (0-30" Hg)
- Solution pressure gauge (0-1500psi)
- 50 ft. water supply line
- Recovery Tank: 65 gallon Maxx-Air®
- Solution pressure adjustment
- Battery box
- Pre-wired pump-in switch
- Van installation kit
- Pre-wired APO Switch
- Operation & maintenance
- Fresh water inlet
- Water system drain valve
- Engine choke
- Engine throttle
- Electrical circuit protection

Briggs & Stratton® Vanguard™ Engine:

- Fuel-efficient 18 HP engine, 1.0 GPH
- Reliable 2 cylinder OHV design
- Fuel efficient
- Keyed ignition
- Easy maintenance
- 3 year limited warranty

Competitor™ SL 3006 Blower

- Hardened, precision helical gears
- Double-row ball bearings at gear end
- Precision machined ductile iron rotors
- Dual oil bath design with oil level sight windows

High Pressure Pump with HydraClutch™

- 3.5 gpm capacity
- Operating pressure, 0 to 1,500 psi
- Clean carpet, stone, tile and concrete floors, hard surfaces and pressure wash

Optional Equipment:

- Dura-Flow™ APO (auto pump-out) is externally mounted for easy service, no filters required
- RX-20™ rotary extraction tool
- DriMaster™ 3 upholstery tool
- 70 Gallon molded underbelly fresh water tank
- Thru-floor exhaust kit
