

## The lightweight vacuum with heavyweight performance

The GM80 is a globally recognized industry icon, used whenever high efficiency and high performance is required, but a small form factor is a must. The GM80's sturdy aluminum container means that the vacuum cleaner is almost indestructible and therefore especially suitable for rough and heavy duty cleaning. Its strong steel trolley and top-mounted grab handle optimize its portability and maneuverability. The GM80 is just as "at home" in pharmaceutical or chemical production areas and hospitals as it is in the office.

The unique multi-stage filtration system allows for adaption to special applications where high filtration level and low emission is required. Choose between types of dust bags, washable sack filters (Polyester, Cotton, Nomex) and special HEPA or ULPA exhaust filters. There is even a specially designed dust bag tailored to toner collection, making it an ideal tool for quietly servicing copiers and printers in an office environment while capturing and containing spilled toner material.

- Available HEPA or ULPA filtration
- 30 foot power cord.
- Compact and easily stored
- Quiet operation
- Lightweight
- Easy to use and service
- Wide variety of filters and bags
- Versatile range of accessories
