Advance's Adphibian™ soft and hard floor machine is designed for maximum efficiency and flexibility by enabling cleaning staff to use one machine to clean carpets scrub hard floors.

A 30 second tools-free changeover lets operators switch between using a full-functioning carpet extractor and a full-functioning cylindrical scrubber. The special anti-microbial brushes are designed to work on all surface types. Our patented AXP™ Onboard Detergent Dispensing System lets the operator choose the perfect cleaning solution for all floor surfaces. And the machine's ease-of-use means fast training and consistent cleaning performance.

The Adphibian multi-surface machine is the first of its kind to be awarded the CRI Seal of Approval for low-moisture and deep-cleaning extraction. Adphibian features our patented dual-cleaning mode that lets operators choose between LIFT™ mode – Low-moisture, Indirect spray, Fast dry time, True cleaning – and Restoration mode. For daily carpet cleaning, Advance's patented LIFT™ technology uses a unique indirect spray that leaves carpets clean and dry in less than 30 minutes.

Adphibian's unique Deep Treat™ pre-spray mode allows you to quickly handle heavily soiled areas by automatically applying and agitating any pre-spray detergent on carpeted surfaces. A simple push of a button then allows the same area to be extracted with clean water.

Picture shown may not represent model quoted

- · Large opening allows for more complete and thorough recovery tank cleaning
- · Ergonomic control paddle
- · Convenient onboard battery charger
- · Debris hopper is easy to remove and empty
- · Single spray jet eliminates streaking
- · AXP Onboard Detergent Dispensing System allows for any brand of green-certified detergent
