

**SUBJECT:** Unloader change

The MV520 unloader is discontinued by the manufacturer and is replaced with a new model: VR54.

**EFFECTIVITY DATE:**

January 2013

**SUMMARY:**

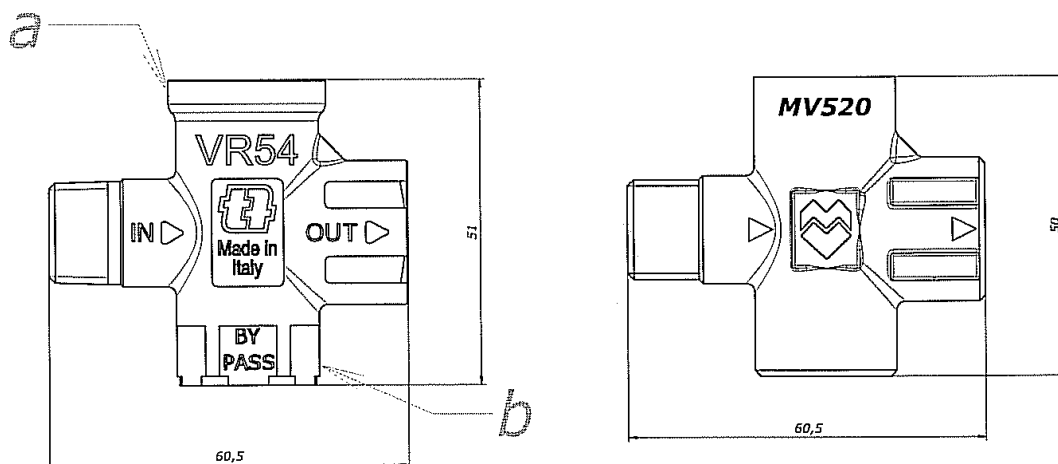

MV changed the forging on their unloader. MV is now “Tecomec” due to a merger of two Italian companies.

The VR54 unloader has the following features and improvements:

The new forging has the Tecomec logo, is 1mm taller, 45% stronger, and has a hex body at the bypass port. All internal parts are interchangeable. Rebuild kits are identical. See photo and dimensional drawing attached.

- Pumptec part number remains unchanged
- Cost is same
- All ports are same
- Same black adjusting knob fits both (old and new) models
- Mounting brackets are the same. However panel cutout hole may need to increase. (see cutout dimensions – pg. 2)

*Samples available upon request.*

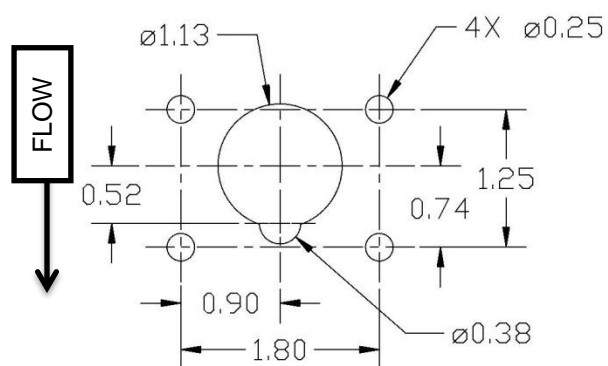

- a.) Collar for higher pressure. Outside diameter = Ø1.05 inches.  
b.) Hex body for easier fitting installation.
