

Commercial Canister Vacuum

Powr-Flite Modular Canister Vacuum
The Professional Choice for Vacuuming

Model
PF9H

Model PF6

- Modular system allows easy exchange of both the power cord and vacuum motor to be replaced without tools or costly service bills
- Unit is available in high filtration and HEPA models with removable filters.
- Performance is maximized with design features making sure that 90% of the engine power is converted into suction energy.
- Constructed of a high quality copolymer, these vacuums stand up to the rigors of commercial cleaning, but are lightweight and maneuverable.

- Low decibel ratings make it possible to use these vacuums during regular working hours, even in hospitals!

Vacuum cleaners are always practical, but tend to be suited for a particular type of job. With the modular components of the new Powr-Flite canister vac, practical has a new definition. With the modular canister system, you choose the components that will best fit your needs. If you have new requirements, simply change the filtration system and maybe an accessory and you have a completely different vacuum for a much lower investment.

The modular canister vac features a unique filtration system designed to maximize the flexibility of the vacuum. The filtration system consist of a paper bag, an internal filter and a blow out filter. The vacuum is available in 2 model levels: high and HEPA filtration. The level of the filtration determines the dust retention, measured in particle sizes and the percentage of what is being captured. You simply choose the filtration required for the job.

High Filtration (PF6 or PF9)

600 – 500 microns	sewing needle diameter or beach sand
400 – 100 microns	razorblade thickness or dust mite
80 – 40 microns	smallest visible particle or pollens categories
20 – 8 microns	pollens/mite feces

HEPA Grade Filtration (PF6H or PF9H)

6 – 2 microns	red blood cells, mite feces, bacteria
2 – 0.4 microns	yeasts of fungi, mite feces dust, bacteria
0.1 microns	tobacco smoke, mite feces, dust, virus

Particle Size in microns (0.001 mm)

Models PF9/PF6 Specifications		
Model	PF9/PF9H	PF6/PF6H
Cleaning Width	11"	11"
Vacuum Motor	1200w double stage	1050w single stage
Cord	32'	32'
Casters	Gray - black soft	Gray - black soft
Bag Capacity	2 gal	1.5 gal
Filtration	High/HEPA	High/HEPA
Water Lift	98"	95"
CFM	106	106
Tools on Board	Crevice, dust, carpet	Crevice, dust, carpet
Wand	Telescopic	Telescopic
Hose	8'	8'
dB Level	59	62
Weight	14 pounds	14 pounds
Shipping Weight	20.5 pounds	20.5 pounds
