Phoenix 4042615, DryLINK Mobile Gateway

Model Number: 4042615

Phoenix 4042615, DryLINK Mobile Gateway

Manufacturer: Phoenix

Phoenix DryLINK Mobile Gateway 4042615
Description
The Phoenix DryLINK Mobile Gateway is a professional-grade asset management system that allows water damage restoration and other types of professionals to monitor the location and status of their equipment with GPS accuracy.

This system is compatible with Phoenix’s DryTAG and DryTAG RH accessories and can be used in shops, warehouses, or mobile warehouses.
Features

• Rapid Updates: The system’s GPS tracking updates automatically every five minutes, giving users real-time location information.

• Scan Feature: An instant scan button is included with the system.

• Antennas: The system includes Bluetooth, Cellular, and GPS antennas, but additional antennas are available for other scanning styles.

• Battery: The system can operate independently through three 3-year batteries, so it won’t stop tracking because power to a building or vehicle is shut off.
