Phoenix 4042055, DrySENSE Moisture Reader

Manufacturer: Phoenix

Phoenix DrySENSE Moisture Reader 4042055
Description
The Phoenix DrySENSE is a Bluetooth moisture content sensor for setting and monitoring moisture goals on the job site, allowing you to focus on what matters. With DrySENSE, moisture content readings are instantly added to the drying report and it will log the time when the drying goal is reached. We keep you in the loop, to make your job a whole lot easier. The attached pins allow you to push the sensor into wet drywall and the included accessory gives you the ability to put stainless screws into harder surfaces to measure the moisture content.
Features

- Save time taking daily readings, take all readings with the push of a button
- Data logging every hour
- When you take readings, they're automatically added to the drying report
- Use the pins to push into wet drywall
- Attach the hard surface accessory, use stainless screws for harder surfaces track last known location
- Receive battery life notifications
- Track temperature and RH
- Log the time when drying goal reached
