Description
Annovi Reverberi pumps are a combination of exceptional degree of technology and innovation. They deliver quality and reliability worthy of a leading brand on the market. The wide range of AR pumps include many models which vary in terms of pressure, delivery, power and technical characteristics, to satisfy widely different market demands.

Plunger pumps are designed for a wide variety of moderate pressure washing applications. They are constructed with die-cast bodies and feature a brass head. Internal components include special thick solid ceramic plungers for long life and durability.

This version of the RKV series of AR pumps feature precision cast cooling fins that are anodized for maximum heat dissipation. The oversized needle bearing on the drive side and ball bearings on the non-drive side assure proper shaft alignment and maximum life. Valve cages of special design are impervious to water absorption and provide positive seating and extended life.
