Husqvarna Fleet Starter Kit — OEM electrical component set for Fleet Services integration
Use Case: Provides the starter hardware for connecting equipment to Husqvarna Fleet Services
50% off discount applied
All sales final.

The Husqvarna Fleet Starter Kit includes machine sensors, a wireless gateway, and setup instructions. Installation involves attaching sensors to each machine, connecting the gateway to power and internet, and registering equipment in the Husqvarna Fleet Services app.

ðŸ”§ Husqvarna Fleet Starter Kit Installation Guide
1. Kit Contents

- 5 Bluetooth machine sensors (attach to equipment)
- Wireless gateway (connects sensors to the cloud)
- OEM installation instructions (included in the kit)
- Fleet Services app (download from Google Play or App Store)

2. Preparation

- Ensure machines are clean and powered off before installation.
- Have access to a stable internet connection for the gateway.
- Confirm you have your Fleet Services account credentials ready.

3. Sensor Installation

- Locate mounting point: Attach each sensor securely to the machine frame near the engine or control area.
- Power source: Sensors are battery-powered; no wiring is required.
- Activation: Sensors automatically begin transmitting once installed.

ðŸ¡ Tip: Assign a unique name/ID to each machine in the app for easy tracking.

4. Gateway Setup

• Placement: Install the gateway in a central location (e.g., workshop or storage area) where machines are parked.
• Power connection: Plug into a standard outlet.
• Internet connection: Connect via Ethernet or Wi-Fi.
• Syncing: The gateway automatically detects nearby sensors and uploads data to the Fleet Services cloud.

5. App & Portal Integration

• Download the Husqvarna Fleet Services app (Android/iOS).
• Log in with your Fleet Services account.
• Register machines: Each sensor-equipped machine must be added to your fleet list.
• Verify data flow: Check runtime hours, location, and usage statistics in the app dashboard.

6. Verification & Testing

• Run each machine briefly to confirm sensor activity.
• Ensure the gateway uploads data to the Fleet Services portal.
• Cross-check machine IDs with sensor assignments.

7. Support & Troubleshooting

• If sensors don’t sync, move machines closer to the gateway.
• Check internet connectivity for the gateway.
• Contact your Husqvarna representative for OEM installation support.

âœ… Outcome: Once installed, your equipment fleet will automatically report runtime, usage, and location data to Husqvarna Fleet Services, enabling digital fleet management, service planning, and inventory control.

•
Verify data flow: Check runtime hours, location, and usage statistics in the app dashboard.
