Description
EL and CNB is our professional series of Cut-n-Break blades that cut in stages through walls up to 400 mm thick, with a very low diamond tool investment.
Features
• Developed for fast cutting in universal construction materials, with a focus on hard materials like granite and hard concrete.
• The blades are specially designed to stand the unique cutting depth up to 400 mm.
• With the specially developed blades this toolprovides high cutting speed and power.
• Pulley incorporated into the blade.
• The segments' design reduces their contact with the concrete surface. This provides a quick and controlled start when using a new blade.
• Designed for high performance across a wide range of applications.
• The segment edge design enables a good cutting speed when applying a new blade, regardless of rotation.
• This diamond tool has a good performance/price ratio thanks to the high performance output in relation to the tool investment.
