Clean Storm 20240824, TurboBrite XL 14-Inch Centering Support Ring for Air Duct Cleaner, Vacuum Drive

Model Number: 20240824

Clean Storm 20240824, TurboBrite XL 14-Inch Centering Support Ring for Air Duct Cleaner, Vacuum Drive

Manufacturer: Clean Storm

Clean Storm 20240824, TurboBrite XL 14-Inch Centering Support Ring for Air Duct Cleaner, Vacuum Drive

Description

Clean Storm 20240824 TurboBrite XL 14-Inch Centering Support Ring lifts the tool body off the bottom of air ducts during cleaning. Engineered exclusively for the 2-inch extra large version of the TurboBrite air duct cleaner, this durable component ensures optimal positioning and smooth navigation throughout residential and commercial HVAC cleaning operations.

Features

- Precision-engineered 14-inch outer diameter designed specifically to center the TurboBrite XL tool inside standard and large-sized ductwork.
- Robust, non-spinning structural design that elevates the vacuum drive head to prevent dragging and floor wear.
- Manufactured from high-strength, wear-resistant materials built to withstand abrasive duct debris and continuous use.
- Custom 46mm bore and 3-inch hub configuration tailored for a secure, precise fit on compatible XL vacuum drive assemblies.

Applications

- Commercial and residential HVAC air duct cleaning systems
- Large-diameter rectangular and round ventilation duct networks
- Compatible exclusively with the Clean Storm TurboBrite XL 2-inch vacuum drive air duct cleaner
- Duct cleaning restoration projects requiring precise tool alignment and height management

Tips and Additional Information

Equipment: Air Duct Cleaning Machines > Turbo Brite Duct Cleaning Packs > Clean Storm 20240824, TurboBrite XL 14-Inch Centering Support Ring for Air Duct Cleaner, Vacuum Drive

Clean Storm 20240824, TurboBrite XL 14-Inch Centering Support Ring for Air Duct Cleaner, Vacuum Drive

Ensure your system matches the 2-inch extra large TurboBrite version before installation, as this unit is incompatible with 1.5-inch models. Inspect the 46mm bore and hub prior to mounting to clear any residual dust or obstructions. This ring is stationary and designed strictly for mechanical elevation and centering rather than dynamic rotation; do not force rotation during setup.

Frequently Asked Questions

Q: Is this support ring compatible with the 1.5-inch TurboBrite model?

A: No. This ring is specifically engineered for the 2-inch extra large version of the TurboBrite air duct cleaner and will not fit the 1.5-inch version.

Q: Does this centering ring spin during the duct cleaning process?

A: No. It is a stationary support ring designed to lift and glide the tool body off the bottom of the duct rather than turn or spin.

Q: What are the exact dimensions of this ring?

A: It features a 14-inch outer diameter (OD), a 46mm bore, and a 3-inch hub.

Warranty & Safety Information

Clean Storm products are backed by standard manufacturer defect warranties. The warranty is strictly voided if the part is used with incompatible equipment (such as 1.5-inch models), subjected to unauthorized modifications, improperly installed onto the tool body, or damaged due to extreme abuse and misuse outside normal HVAC cleaning operations. Always power down and disconnect auxiliary equipment before performing maintenance or accessory changes.

Upgrading from carpet and tile cleaning to air duct cleaning? What options Are There?
