Model Number: 20241134

Clean Storm 20241134 Air Duct Cleaning Reverse Blast Assembly with 1/4 Barbed Fitting Installed

Manufacturer: Clean Storm

Clean Storm 20241134 Air Duct Cleaning Reverse Blast Assembly with 1/4 Barbed Fitting Installed

1 unit included with order

Plastic ball with 6 reverse facing blast holes.

Mounts with most store brands of air compressors that use 1/4" ID pressure hose

Works best with 12+ CFM air compressors but can be used with standard 6 CFM home style air compressor if you are willing to let the air tank catch up between cleaning strokes.

The advantage of using a 12+ CFM air compressor is you to not have to wait on the tank to refill but can clean non stop.

Note this type of cleaning system is totally relying on your air compressor to perform all the cleaning action since there is no direct contact or scrubbing action. If your plan is to use with a small, baby residential air compressors, please read the return restocking fee notes before you complete this sale.
