Husqvarna 547676701 15 Pack CASE A25 Replacement Pre-filters

Manufacturer: Husqvarna Equipment

Husqvarna 547676701 15 Pack CASE A25 Replacement Pre-filters

The A25 is part of our latest generation of air cleaners, developed with a whole new level of intelligence and mobility to meet customer demands. Recommended for spaces up to 25 m²; in a single-use set up. A colour-coded visual alarm clearly indicates the filter status. The innovative units are compact and stackable – an advantage when it comes to maintenance, transportation and handling. The A25 can be used as both an air cleaner and a negative air machine. Two- or three-stage filtering captures various particles commonly produced on a construction site, including silica dust and wood dust, as well as dust from metal, gypsum and other materials. The active carbon filter is available as an option.
