Manufacturer: Legend Brand

Legend Brand Ford Transit and ProMax Modular Aluminum and Stainless Van Shelves See Drop Down List To Add To Cart

PRODUCT DETAILS

This ultimately flexible Modular Van Shelving is the first vehicle storage system developed specifically for professional cleaning and restoration contractors.

Today's contractors do far more than just carpet cleaning and restoration, requiring them to carry more equipment and specialty tools.

With weight carrying capabilities up to 225 lbs. per shelving unit, this modular industrial shelving allows contractors to essentially double their van's usable storage capacity. All shelving is rustproof aluminum except for the chemical shelf, which is stainless steel.

More equipment on the truck means fewer trips to the shop - and an organized workspace can shave hours off the work week.

These modular shelf kits are designed to take advantage of the space in today's high-top vehicles, such as the Ford Transit or RAM Promaster. (Shelving can fit in traditional vans but no installation instructions are provided.)

SPECIFICATIONS

FEATURES

Shelving Base Kit - Required frame for attaching shelves. Includes installation hardware.

High Roof Extension kit - Adds 12 inches to the base kit for high-top van applications

Standard Fixed Shelf - Perfect for airmovers, toolboxes and accessories. Max. capacity: 125 lbs. | 56.7 kg

Standard Folding Shelf - Use only when needed. Max. capacity: 185 lbs. | 83.9 kg

Chemical Shelf Kit - Stainless Steel, rolled edge shelf. Each shelf holds 7 one-gallon bottles or jars.

Heavyweight Folding Shelf - Folding shelf design for larger heavier equipment and tools. Max. capacity: 250 lbs. | 113.4 kg

Options:

• Chemical Shelf Kit (127801): \$125.00

• High Roof Extension Kit (127796): \$64.00

>

• Heavyweight Folding Shelf (127805): \$402.00

• Shelving Base Kit (127793) \$512.00

• Standard Folding Shelf (127800): \$400.00

• Standard Fixed Shelf (127799): \$260.00

Notes: Factory has a 25% restocking fee and only store credit on returns. In other words, no refunds only store credit on your next purchase after the loss of any shipping fees (as they are not refundable by UPS/Fedex) and loss of restocking fee. All upper shelves are Aluminum, bottom chemical shelf is currently stainless steel, all hardware is zinc plated steel. The equipment will not stay on the shelves during transport so you must ratchet strap down your equipment. Some photos show a gray bar on the bottom of some photos. This is not part any of the kits but rather is just a rack that was designed on casters to be able to display these options in the showroom.

How to purchase, see drop down list of each accessory and highlight and add to cart. Then come back to this page highlight the next accessory, add to cart and then come back to this page and repeat as needed. Go to https://www.steam-brite.com/shopping_cart.php to adjust cart as needed.
