Husqvarna 970516901, 14in 350mm LFe 60 LAT, Forward Plate, Soil and Asphalt Compactor, Honda eGX, GTIN 805544565998

Manufacturer: Husqvarna Equipment

Husqvarna 970516901, 14in 350mm LFe 60 LAT, Forward Plate, Soil and Asphalt Compactor, Honda eGX, GTIN 805544565998

Description

The battery-powered LFe 60 LAT is designed for efficient compaction of asphalt and soil. It is ideal for repair jobs and maintenance work such as driveways and parking lots. The brushless electric motor runs on the new Honda battery platform, specifically developed for compaction applications. It is almost maintenance-free and offers a low running cost. The machine is easy to handle, with low noise and zero CO₂ emissions during use. The water tank is removable and easy to refill. The machine is easy to clean and especially suited to compact fresh asphalt, as the bottom plate and the water sprinkling system are designed to prevent the fresh asphalt from sticking to the equipment or creating marks on the ground.

Features

- Enjoy the freedom of working with an electric machine. Explore the potential of new applications by running the machine indoors or in urban areas where emissions or noise levels might be regulated.
- You're good to go with a simple push of a button and no need to refill fuel. The low need for maintenance means lower running cost and comfortable ownership for you.
- The patented low-vibration handle considerably reduces hand-arm vibrations. Thus, operators experience less fatigue and can work longer hours. This machine is equipped with transport wheels and a foldable handle for convenient transport.
- The electric motor and its battery is easy to handle and maintain. Yet, the machine in total is heavier than our corresponding petrol compactors, to ensure even better compaction results.
- The adjustable water tank allows to precisely control the water flow to prevent the bottom plate from sticking to hot asphalt. To complement is the smart convex bottom plate which leaves no mark on asphalt.
