Manufacturer: Udor USA

Udor USA P-Series Valve Kit 6061.01
Description

Udor 6061.01 Valve Kit UD-1 for P-Series High Pressure Plunger Pumps. Repair your high pressure Udor plunger pump with the valves included in this kit. Valves are usually replaced when the pump is experiencing pressure fluctuation, or drops in pressure. Worn or corroded valves can also cause the pump to not draw water. In order to properly determine if your valves need to be replaced, check the Udor Troubleshooting Guide in Resources. It will help you determine what is wrong with your Udor Plunger Pump.
Udor UD-1 Valve Kit (# 6061.01):

- 6 valves in kit
- Use for Udor P-Series High Pressure Plunger Pumps. Also works with PDCW-Series Car Wash Pumps.
