## Description

The versatile Blastrac 1-10DPS75 walk-behind shot blasting machine is optimal for medium to large sized surface preparation applications. It is ideal for cleaning and preparing surfaces such as concrete and asphalt before the application of a new coating. Equipped with a drive motor, it helps maintain speed on ramps and inclines, making it a great choice for restoring skid resistance and traction in parking garages or on warehouse floors. The Blastrac 1-10DPS75 shot blaster is easy to operate and transport.

## Features

- The shot blasting machine has to be connected to a Husqvarna industrial dust collector to create a closed circuit. This means that you are able to work virtually dust free, creating a better work environment.
- This machine is equipped with a driver motor for ease of use. It also improves productivity and promotes a more even and consistent blast pattern and surface profile.
- The shot blasting machine is equipped with a dust hose holder making operation more efficient while blasting.
- This self-propelled shot blasting machine features drive controls on the steering handle.
- Reusing the abrasives makes this a resource-smart solution. Also no water is used and wasted and no chemicals are used during the blasting process.
