Manufacturer: Husqvarna Equipment

Husqvarna 970693401, Blastrac BMR 25P, Shot Blaster for Surface Preparation, Propane, 25hp, 970 69 34-01, GTIN 805544299015

Description

Blastrac BMR 25P is a ride-on shot blasting machine with integrated dust collection system and a 25HP Kohler propane engine. The machine features floating head technology, HEPA filtration and user friendly controls. Optional scarifier attachment makes this machine a real multi-task shot blaster suitable for most surface preparations applications.

Features

- The shot blasting machine has to be connected to a Husqvarna industrial dust collector to create a closed circuit. This means that you are able to work virtually dust free, creating a better work environment.
- For smoother operation, the blast head follows the floor surface thanks to floating head technology.
- Integrated bagging system for handling of large amounts of dust.
- Optional attachment available which makes it possible to use the machine for scarifying.
- Reusing the abrasives makes this a resource-smart solution. Also no water is used and wasted and no chemicals are used during the blasting process.
