• Fragrance dispenses .75 oz of fragrance formula per thirty seconds, which is equal to 1.5 oz of liquid formula per minute. 1 gallon of liquid formula = 128 oz and the dispensing rate is 1.5 oz per minute. One gallon of liquid formula yields 85 minutes of vend time or 170 thirty-second vend cycles

VAULT READY DESCRIPTION: There are two primary ways to store coins in a self-serve environment; either inside the equipment in a coin box or in a vault that is installed beneath the meter to collect coins. Vaults can hold anywhere from $700 in quarters for the 10-inch model up to $1600 for the 18-inch (10”, 14”, and 18” vaults available for sale). Since most vaults are cemented or bricked in on all sides they are very difficult for thieves to break into.
