PEX Series
Portable Heated Carpet Extractors

When you have been designing portable carpet extractors for professional carpet cleaners for over 35 years, you find the important features that the professional carpet cleaner needs to make their job easier, more productive and more effective.

With the end user in mind, the PEX Series were designed with a precision balanced, upright design for easy transport, loading or unloading by one person. The PEX Series also have a built-in wand caddy, retractable hose wrap, and built-in cord wrap so you can easily transport the PEX to job sites without an armful of accessories to carry.

To ensure satisfaction for our valued customers, the PEX Series were third party tested and certified by the Carpet & Rug Institute for proven cleaning performance.

A new KEY feature to the PEX Series is the "Daytime Quiet" cleaning performance. Pioneering quiet cleaning is another way we are helping our customers have a safer cleaning environment and deliver higher satisfaction to their clients.

This webpage is for machine only, no hoses, not wands.

The exact color or shade of the machine is subject to change without notice.
Item filled by part number and not by color.
