RHG Tucker DI Tank 1 Cubic Foot Kit

Description

This is a complete kit. Not just the tank and resin.

Steambrite Supply

RHG T-DI-Tank-935-KIT Tucker Replacement DI Water Softner Tank 1 Cubic Foot Kit

RHG T-DI-Tank-935-KIT Tucker Replacement DI Water Softner Tank 1 Cubic Foot Kit

These 1 cubic foot DI tanks are ideal for those in the following situations:
- Low TDS (total dissolved solids) area where cost of purification is low
- High TDS area in conjunction with a Tucker® reverse osmosis system for high volume production

The benefit of a large DI tank like this is that you can run many gallons per minute through it and still get ultra pure water compared to smaller DI systems that need to run at much lower flow rates to achieve the best water.
Simple 3/4" brass garden hose fittings on inlet and outlet. Hook up your tap water supply hose to the inlet and your pure water supply line to the outlet. As the tap water flows through the system it is purified by the Tucker® virgin DI resin that is included in this kit.

This kit includes the following:
QTY 1 - 3/4" female swivel brass garden hose inlet fitting
QTY 1 - 3/4" male brass garden hose outlet fitting
QTY 1 - 1 cubic foot DI tank
QTY 1 - 1 cubic foot Tucker® virgin DI resin in reusable bucket
QTY 1 - large mouth funnel for filling your DI tank
QTY 1 - Tucker® handheld TDS meter for checking water purity
QTY 1 - roll of teflon tap for brass fitting installation

Specs:
9" wide x 35" tall
Estimated 1600 gallons per resin change at 100 Parts per million incoming water quality.
All RHG and Tucker® brand purification systems come with a 10 year warranty and are assembled in the US.
