Description

Our lineup offers two distinct versions of PCD (polycrystalline diamond) cup wheels, T-Rex 0 and T-Rex Super, specifically designed to cater for the varying requirements of our customers. The T-Rex 0 tool provides a low removal rate aggressivity, making it ideal for situations where less than 1 mm of material needs to be removed. The cup wheel exhibits high stability, thanks to the presence of segments that rest on the ground. Additionally, the segments serve the purpose of protecting the PCD and prolonging the cup wheel's lifespan.

Features

- Efficiently removes coatings such as glue, levelling compounds, paint, thin epoxy coatings and tile screeds.
- Efficiently removes all kinds of strongly bonded coatings, adhesives and screeds, such as epoxy, glue and paint.
- Ideal for achieving the desired grinding or polishing result along the edges of concrete floors.
- This engineered system ensures an optimal balance between tool wear and grinding or polishing speed, helping you achieve the desired result in a minimal amount of time.
