PMF Mach-15-TEF Titanium Carpet Cleaning 15in Wand with Teflon Glides AW79 Mach15Tef

PMF's Mach-15-TEF new 15” wide Titanium wand with Teflon Glide Lip was engineered for maximum recovery and ease of use.
Made with the highest quality components.
Designed to be used with truckmounted, gas powered carpet cleaning machines.
• 15” wide, 2” diameter tube
• Under 9lbs. finished weight
• V800EZ valve
• Stainless steel jets with
stainless steel check valves
• 2 adjustable manifolds on the 15”
You can adjust the distance from the carpet and the angle of the spray!
• Filter before the valve

AVAILABLE IN 5 Jet style only!

Titanium Wand
If it's got to be light and strong, it's got to be titanium!
Weighing in at less than 9 lbs, this 2" heavy-duty truckmount wand with a 15" head will easily, and quickly, power through the toughest jobs. The 6 stainless steel jets provide a wider coverage than most wands and the Teflon glide reduces friction, and more importantly, back fatigue on those days that never seem to end.
A unique feature of the wand is the ability to adjust the depth of the jets. The jets can be moved closer to the carpet to reduce heat loss, or moved back for a wider coverage.
The Hydro-Force Titanium Wand comes standard with the Soft Touch Upholstery valve; the unique design allows you to 'throttle' the valve and reduces wrist and finger fatigue.
Details:

- Titanium construction
- S-bend 2" tubing
- Stainless steel jets
- Stainless steel Soft Touch Valve
- 15" head
- VeeJets include strainer and check valve
- Rated at 1,500 PSI
- 6 stainless steel jets: 4 outer 9501 and 2 inner 11001 (NOW UNAVAILABLE) OR 5 jet system (Your choice but 5 jet is default)

Side notes:
I have confirmed that the Mach-15 is a .25" opening X 15" wide = 3.75 cubic inches.
1.5" ID hose is 4.71 cubic inches.
2" ID hose is 6.28 cubic inches.
Many times for flexibility we as carpet cleaners use 1.5" id hose as leader hose (myself included) because 2" hose is stiff and heavy. As we get closer to the carpet we want to make sure that the lip is the smallest opening.
In order to work properly the lip would have to be under .3 inches.
A 1/4" lip is and has always been and industry standard lip opening.

Testimonial:

"Love the wand! WOW, if I would of known how nice this wand was I would of bought it a long time ago. The recovery on the wand is through the roof. Blows away any thing I try so far. Dry time are unbelievable.

The built quality is far better than any thing i used."
