Product Type
Continuous dust bag / liner system

Application
Dust extractors, pre-separators, and industrial vacuum dust collection

Common Use

>

Concrete dust, silica dust, drywall dust, grinding debris, and surface prep material

Recommended Applications

- Concrete grinding and polishing
- Surface preparation and coating removal
- Industrial vacuum dust collection
- HEPA dust extractor disposal systems
- Construction and remodeling dust containment

How the Continuous Bag System Works

This style of dust collection system allows the operator to pull down fresh liner material as debris is collected. Once the lower section is filled, it can be tied or sealed, cut off, and disposed of while leaving a new liner section ready for continued operation.
