Legend Brands 107263 Pump 12V Clutch Retrofit Pitts Replacement 7in Diameter Ogura 48-106

Model Number: 107263

Legend Brands 107263 Pump 12V Clutch Retrofit Pitts Replacement 7in Diameter Ogura 48-106

Manufacturer: Legend Brand

Legend Brands 107263 Pump 12V Clutch Retrofit Pitts Replacement 24mm 7in Diameter Ogura 48-106

The mobile clutch in typical water pump applications, the clutch is mounted on the input shaft of the water pump. Since the clutch has an integral puller, a belt is used as the input to the clutch. This belt is normally driven directly from an electric motor or a gas/diesel engine. When there is no power to the clutch, the water pump does not engage; however when power is activated, the clutch drives the water pump to initiate water flow. In this application, the Pump clutch is mounted directly to a Pump by using an adapter plate. A Pump Mobile Clutch Design Advantages is that it has a Solid Forged Rotor: A one-piece solid forged rotor means no chance of internal parts separation. They have an even wall thickness around the coil which gives optimum flux distribution, maximizing torque.
Item filled by part number and not by the photos

Ogura, 75 ft/lb, 7 in, 12v,

Pulley Size & Type: 7"
Width:
Torque After Burnishing 75-95 lbs
Power Requirement: 12 V, 47 Watts
Weight: 8 lbs

Shipping Weight 10 lbs

Shipping added to all orders even for local pick up in San Antonio, TX
