Manufacturer: RHG Reach Higher Ground

Tucker Water Fed Brush â", Dual Trim - Boar and Nylon Bristle Hybrid - 4 Pencil Jets XL Size 17in x 3in

Description

ALL STANDARD BRUSHES NOW INCLUDE THE LOCT SYSTEM
Our dual trim water fed brushes are one of the best investments you can make in your commercial solar panel and window cleaning business.
Each of these hybrid brushes comes with dual trim bristles made of both boar hair and nylon monofilament. This allows you to use pressure on the water fed pole to splay the longer, outer bristles outwards into the corners and seals of the window, while continuing to scrub with the inner bristles that remain in a vertical tip-to-glass position.
This particular unit is handy for heavily soiled glass due to it's four individually plumbed pencil jets. Pencil jets are excellent at blasting the surface of glass with direct streams of water, allowing the extra pressure to wash away stubborn dirt and dust.
This is an incredible brush as an incredible price and will make for a great upgrade over anything you are currently using.
Brush may come in red or black depending on availability.

Details:

- Made in USA
- Dual Trim

Steambrite Supply
