HydroForce 2648-6593 Stainless Steel Modular Van Shelf - Complete Adjustable 269458

Manufacturer: HydroForce

HydroForce 2648-6593 Stainless Steel Modular Van Shelf - Complete Adjustable 269458

The Hydro-Force Modular Van Shelf offers the ultimate in flexibility and versatility when compared to other modular systems. This system fits in virtually any van and allows for adjustments not available with other units.

The individual shelves of the Hydro-Force Modular System can be adjusted to fit closer to the van wall, or further away based on the contractor's needs, type of vehicle or type of installation. In addition, the shelves can be adjusted up or down to ensure they are always level, regardless of the install. Many competitive units are unlevel as they only follow the angle of the van body, or the base is moved further out into the van floor, eating up valuable space.

The Hydro-Force Modular Shelf also includes some unique hardware pieces that ensure a solid, safe and secure installation that will hold up to the rigors of everyday use and / or vibration issues a vehicle can experience during travel.

Owner Manual

Features of the Hydro-Force Modular Van Shelf:

Shelves are made from Stainless Steel while vertical posts and cross members are made from aluminum, offering an excellent combination of strength, durability and corrosion resistance.

Shelves are 47" W x 7" D x 4" H, and hold seven (7) standard gallon bottles.

Shelves can adjust several inches in or out away from wall as well as tilt up or down to ensure a level mount and to maximize storage efficiency.

Unique hardware such as heavy duty angle brackets and self-aligning T-slot nuts provide a secure and stable mount.
