Husqvarna 533941101 Continuous Dust Bag Conversion Kit for BDC66 (OEM)

Genuine Husqvarna OEM Part

Part Number: 533941101

GTIN: 7392930865693

Application: Conversion kit for Husqvarna BDC66 dust extractors

The Husqvarna 533941101 conversion kit upgrades compatible dust extractors to a continuous dust bag collection system. This allows operators to create sealed disposal bags as needed, reducing airborne dust exposure and improving jobsite efficiency.

Key Benefits

- Upgrade your dust control: Converts traditional collection systems to continuous bag disposal.
- Improved safety: Helps reduce exposure to fine dust during emptying.
- Faster disposal process: Tie off, cut, and continue working without opening the vacuum tank.
- OEM engineered fit: Designed specifically for Husqvarna BDC66 systems.
- Professional-grade performance: Ideal for concrete grinding, surface prep, and industrial dust collection.

What This Kit Does

This conversion kit replaces the standard dust collection method with a continuous liner system. Instead of removing a full container or bag, operators can:

- Pull down liner material as debris collects
- Seal the filled section
- Cut and dispose of the sealed portion
- Continue operation with a fresh liner
