Husqvarna 534081601 Continuous Dust Bag Conversion Kit for BDC99 (OEM)

Genuine Husqvarna OEM Part

Part Number: 534081601

GTIN: 805544775205

Application: Conversion kit for Husqvarna BDC99 dust extractors

The Husqvarna 534081601 conversion kit upgrades compatible dust extractors to a continuous dust bag collection system. This system allows operators to create sealed disposal bags as needed, helping reduce airborne dust exposure and improving jobsite efficiency.

Key Benefits

- Upgrade your dust control: Converts standard collection systems to a continuous bagging system.
- Safer disposal: Reduces exposure to silica dust and fine particulate during emptying.
- Improved workflow: Tie off, cut, and continue working without opening the vacuum tank.
- OEM Husqvarna fit: Engineered specifically for BDC99 systems.
- Heavy-duty jobsite use: Ideal for concrete grinding, surface prep, and industrial vacuum applications.

What This Conversion Kit Does

This kit replaces the traditional dust collection method with a continuous liner system. Instead of removing a full container or bag, operators can:

- Pull down liner material as debris accumulates
- Seal the filled section
- Cut and dispose of the sealed portion
- Continue working with a fresh liner section
