Phoenix 4028371, Lay Flat 8in Round x 250ft, Lightweight Poly Air Ducting, Restoration Equipment

Model Number: 4028371

Phoenix 4028371, Lay Flat 8in Round x 250ft, Lightweight Poly Air Ducting, Restoration Equipment

Manufacturer: Phoenix

Phoenix 4028371, Lay Flat 8in Round x 250ft, Lightweight Poly Air Ducting, Restoration Equipment
Description
Phoenix lay-flat ducting is a lightweight polyethylene ducting solution designed to efficiently direct airflow from dehumidifiers, air scrubbers, or heaters in restoration and drying applications. This 8-inch round ducting comes in a convenient 250-foot roll that can be easily cut to your desired length, providing flexible and cost-effective air distribution for professional restoration projects.
Features

- 8-inch diameter round ducting for optimal airflow capacity
- 250-foot continuous roll allows custom length cutting
- Lightweight poly construction for easy handling and installation
- Attaches securely via standard duct rings or clamps
- Low-leakage design ensures efficient air delivery
- Suitable for supply or exhaust air applications
- Water damage restoration air circulation
- Dehumidifier exhaust or supply ducting
- Air scrubber connection for negative air systems
- Heater air distribution in drying applications
- Temporary HVAC and ventilation projects
