Phoenix 4039841-01, Vented Condensate Pump, 215V 60Hz

Manufacturer: Phoenix

Phoenix 4039841-01, Vented Condensate Pump, 215V 60Hz

Description

The Phoenix 4039841-01 is a vented condensate pump designed for Phoenix dehumidifiers. This essential component ensures reliable pumping of condensate water with integrated venting to prevent pressure build-up during operation.

Features

- Vented design prevents pressure build-up for consistent operation
- Rated for 215V/60Hz electrical systems
- Designed specifically for Phoenix dehumidifier systems
- Reliable condensate water removal

Specifications

Voltage
215V / 60Hz

Part Number
4039841-01

Type
Vented Condensate Pump

Compatibility
Phoenix Dehumidifiers
