Manufacturer: RHG Reach Higher Ground

Tucker 4060 RO/DI Water Fed Pole Solar Panel Cleaning Kit with 150ft Hose Reel - 27ft Reach

Description

This professional-level pure water cleaning system features our powerful 4060 RO/DI cart with two 30" RO membranes. This is the best equipment on the market for solar panel cleaning. We get many calls from people looking for a complete kit to get set up to clean solar panels, and we put this kit together specifically for that application.

This bundle includes our:

• Tucker® 4060 4-Stage RO/DI Mobile Cart
• Tucker® Hand Carry Hose Reel with 150' of 3/8" ID hose
• A Tucker-Solar Boost 27' Reach Water Fed Pole with XL Alpha Badger Solar Brush

Tucker® 4060 Mobile RO/DI Cart
Tucker's commercial work horse! This system will produce more water than others making your cleaning time faster.
Other systems on the market use a 40" RO Membrane that can supply 1 pole on line pressure. Using (2) 40" RO Membranes gives you more flow and capacity, but the size and weight makes it completely impractical in a mobile application.
At Tucker® we have the unique opportunity to produce 30" RO Membranes that produce nearly the same water as the leading 40" RO Membranes on the market and when we combine 2 of them you get the performance of 80" or RO Membrane, but in a much more compact design. How's that? We use much lower operating pressure RO Membranes than anyone else in the market. This RO Membrane technology is ONLY available in Tucker® branded systems and all other systems simply can't compare.
