Model Number: 117102

Legend Brands 117102 Stainless 3/8" NPT x 1/4" Compression Fitting For Sapphire Scientific 370 SS Heat Exchanger

Manufacturer: Legend Brand

Legend Brands Dri-Eaz 117102 3/8" NPT Compression Fitting with 21.500" Tube
Genuine OEM Legend Brands replacement fitting assembly.

The Legend Brands Dri-Eaz 117102 is a factory-original compression fitting assembly featuring a 3/8-inch NPT threaded connection and an approximately 21.500-inch tube. It is designed for use on select Dri-Eaz and Legend Brands equipment where a leak-free, factory-quality fluid connection is required.

Always verify the complete manufacturer part number before ordering, as similar fittings may have different tube lengths or thread configurations.

Features

- OEM Legend Brands replacement part
- Dri-Eaz Part Number: 117102
- 3/8" NPT threaded compression fitting
- Factory tube length: 21.500 inches
- Precision manufactured for proper sealing
- Designed for dependable long service life
- Direct replacement for worn or damaged original fitting assemblies

Benefits of OEM Replacement Parts

- Maintains original equipment performance
- Provides proper fit without modification
- Reduces risk of fluid leaks
- Built to factory specifications
- Helps maximize equipment reliability

Compatibility

This fitting is used on select Legend Brands and Dri-Eaz equipment. Because manufacturers often make running production changes, compatibility should always be confirmed using the equipment model number, serial number, and factory part number 117102.

If you are unsure whether this is the correct part, contact SteamBrite with your machine information before ordering.

Package Includes

- One OEM Dri-Eaz 117102 compression fitting assembly

Installation

Disconnect all electrical power and relieve system pressure before servicing equipment. Inspect all mating threads and sealing surfaces for damage before installing the replacement fitting.

Frequently Asked Questions

Is this an OEM part?

Yes. This is a genuine Legend Brands factory replacement component.

Does this include multiple fittings?

No. This listing is for one fitting assembly unless otherwise noted.

Will this fit every Dri-Eaz machine?

No. Always verify part number 117102 and confirm compatibility with your model and serial number.

Can compression fittings be reused?

Whenever possible, inspect the ferrule and sealing surfaces carefully. Damaged compression components should be replaced to ensure a leak-free installation.
