Model Number: 000-078-159

HydraMaster 000-078-159 Valve Kit (6-Pack) for 000-111-042 HydraMaster Comet Pump LWS3525S Equivalent

Manufacturer: Comet Pump

HydraMaster 000-078-159 6 Pack Valve Kit for HydraMaster 000-111-042 Pump

HydraMaster 000-078-159 6-Pack Valve Kit

For HydraMaster 000-111-042 Pump (Comet LWS3525S)

Restore full performance and reliability to your pump with the HydraMaster 000-078-159 Valve Kit. This complete 6-pack valve set is designed to service the internal check valves of the HydraMaster 000-111-042 pump, commonly used in truckmount cleaning systems.

Over time, pump valves wear due to heat, pressure, and debris, leading to reduced pressure, pulsation, or loss of flow. Replacing worn valves with this kit helps bring your pump back to proper operating condition—improving efficiency, consistency, and overall lifespan.

Key Features

- Complete 6-valve kit (3 inlet + 3 discharge)
- Includes valves and sealing components for a full service
- Restores pressure, flow, and pump efficiency
- Built to handle high-pressure, continuous-duty operation
- Direct replacement for HydraMaster 000-111-042 pump assemblies

Compatibility

- HydraMaster 000-111-042 pump
- Equivalent to Comet LWS3525S pump platform
- Fits LW / LWS series triplex plunger pumps

>

When to Replace

- Loss of pressure or inconsistent spray
- Pump pulsation or vibration
- Reduced water flow
- Preventative maintenance on high-hour machines
- High hours on original valves
- Pump was used in bypass mode too long
- If pump is or was used in a cavitation environment

What's Included

- (6) Valve assemblies
- (6) Required sealing components (O-rings)

Pro Tip

For best results, inspect plungers and seals during valve replacement. Installing new valves alongside fresh seals ensures maximum pump performance and longevity.

Used in and on:

Hydramaster Boxxer series
Spitfire series
Titan units
