Magnetic Clamp-On Water Softener Descaler for Truckmount & Portable Carpet Cleaning Machines 20260425 Magnetizer

Model Number: 20260425

Magnetic Clamp-On Water Softener Descaler for Truckmount & Portable Carpet Cleaning Machines 20260425 Magnetizer

Manufacturer: Clean Storm

Truckmount & Portable Carpet Cleaning Machine Magnetic Clamp-On Water Softener & Descaler 20260425
Clamp-on magnetic water softener and descaler for truckmount and portable carpet cleaning machines. Helps reduce calcium scale buildup in heaters, coils, pipes, and heat exchangers. No salt, chemicals, filters, cartridges, or maintenance required. Compact 4 inch body installs before the heater or pump on water lines under 3/4 inch ID.

Help prevent scale buildup in carpet cleaning machines, truckmounts, portable extractors, tile cleaning machines, pipes, coils, and heat exchangers. This compact clamp-on magnetic descaler is designed to treat hard water before it reaches the heater, helping minerals stay suspended instead of sticking to hot internal surfaces.
âœ… Key Benefits

- Helps prevent scale buildup in pipes, coils, heaters, and carpet cleaning heat exchangers
- Reduces or eliminates routine monthly descaling in many applications
- Clamp-on installation — no cutting, plumbing, salt, chemicals, or cartridge replacement
- Maintenance-free design — no salt, resin, plastic pellets, filters, or media to flush
- Improves heat transfer efficiency by helping keep mineral buildup off heater surfaces
- May improve water flow / GPM by helping reduce mineral restriction over time
- Only 4 inches long for installation in tight areas on portable and truckmount equipment
- Longer Equipment lifespan

ðŸ”¥ Better Heat Transfer For Hotter Cleaning Water
Scale acts like insulation inside a heat exchanger. When calcium and mineral deposits coat the inside wall, your heater has to push BTU energy through that mineral barrier before heat can transfer into the water.
By helping prevent minerals from sticking to the heat exchanger walls, this clamp-on magnetic descaler allows more heater energy to transfer into the water for improved heating performance and better cleaning results.
ðŸ§ How Magnetic Water Treatment Works
This unit uses hydromagnetic water conditioning to help align ions in the water and restructure hard water minerals so they are less likely to bond to pipes, coils, and heater surfaces.
After treatment, the water still contains calcium and magnesium. The difference is that

Steambrite Supply

Magnetic Clamp-On Water Softener Descaler for Truckmount & Portable Carpet Cleaning Machines 20260425 Magnetizer

these minerals are encouraged to remain suspended in the water instead of attaching to the walls of the heat exchanger.
Minerals can remain suspended for up to 200 feet of water travel, making this a strong fit for carpet cleaning machines, truckmounts, portable extractors, pressure washers, pressure-fed cleaning systems, and tile cleaning equipment.
ðŸ› Easy Clamp-On Installation

- Install on the water line before the heater or heat exchanger
- If there is not enough clearance between the pump and heater, install before the water pump
- Clamps over most pipe or hose lines under 3/4 inch inside diameter
- No plumbing modifications required in most installations
- Can be secured with zip ties or hose clamps. Installation screws also provided.

ðŸ“¦ Compact Size

- Length: Approximately 4 inches
- Application: Truckmounts, portable carpet cleaning machines, tile cleaning machines, heaters, coils, and small water lines
- Install Style: External clamp-on magnetic water conditioner

âš– Magnetic Descaler vs. Salt Softener vs. Chemical Descaler

Feature	Magnetic Clamp-On Descaler	Salt Water Softener	Chemical Descaler
Installation	Clamp onto outside of pipe or hose	Requires plumbing, salt tank, and setup	Added during cleaning or maintenance process
Maintenance	No salt, filters, cartridges, or media	Requires salt refills and service	Requires repeated chemical use
Ongoing Cost	No consumables	Salt and maintenance costs	

Magnetic Clamp-On Water Softener Descaler for Truckmount & Portable Carpet Cleaning Machines 20260425 Magnetizer

Chemical purchase cost

Water Minerals
Minerals remain in water but are less likely to stick
Removes/replaces hardness minerals
Dissolves existing mineral deposits

Best Use
Prevention and ongoing scale control
Whole-system water softening
Cleaning neglected scale buildup

Machine Downtime
Minimal
Varies by installation
Requires descaling time

â• Frequently Asked Questions
Q: Does this remove calcium and magnesium from the water?
A: No. Calcium and magnesium remain in the water. The magnetic treatment helps condition the minerals so they are less likely to stick to pipes, coils, and heat exchanger walls.
Q: Where should this be installed?
A: Best installation is before the heater or heat exchanger. If there is not enough room, clamp it before the water pump.
Q: Does this replace chemical descaling?
A: It is designed to reduce or eliminate routine descaling by helping prevent new scale buildup. Severely neglected heat exchangers may still need an initial cleaning.
Q: Will this work on truckmounts and portable machines?
A: Yes. The compact 4 inch design makes it suitable for many truckmount carpet cleaning machines, portable extractors, tile cleaning machines, and heated cleaning systems.
Q: Does it require salt or filter cartridges?
A: No. This is a clamp-on magnetic conditioner with no salt, plastic pellets, resin, filters, or cartridges to replace.
Q: Can it help improve water flow?
A: By helping reduce mineral buildup and restriction inside heated water passages, it may help maintain better water flow and GPM through the machine.

Magnetic Clamp-On Water Softener Descaler for Truckmount & Portable Carpet Cleaning Machines 20260425 Magnetizer

- Truckmount carpet cleaning machines
- Portable heated carpet extractors
- Tile and grout cleaning equipment
- Heat exchangers and heater coils
- Hard water areas where scale buildup is common
- Operators wanting less monthly maintenance

Magnetic Clamp-On Water Softener Descaler for Truckmount & Portable Carpet Cleaning Machines 20240424
Google Shopping Optimized Description
Clamp-on magnetic water softener and descaler for truckmounts, portable carpet cleaning machines, tile cleaning equipment, pipes, heaters, coils, and heat exchangers. Helps prevent calcium and mineral scale buildup, improves heat transfer, supports hotter cleaning water, and may improve water flow. No salt, chemicals, filters, cartridges, plastic pellets, or maintenance required. Compact 4 inch design installs in tight areas before the heater or pump on lines under 3/4 inch ID.
ðŸ”§ Additional Advantages

- Helps extend equipment life by reducing mineral buildup in pumps, valves, and heat exchangers
- Reduces downtime by minimizing the need for descaling and maintenance interruptions
- Maintains consistent performance by helping prevent gradual scaling inside the system
- Lowers total cost of ownership with no chemicals, salt, filters, or replacement media
- Eco-friendly solution with no chemical discharge or wastewater concerns
- Transferable between machines — easily move from one unit to another
- Works in any orientation and does not restrict water flow
