Model Number: 593446401

Husqvarna 593446401 OEM Husqvarna Dust Bag System 4 Pack, 65 ft, 4x20M, 6.6 mil, 66 microns, Extra Strong 7391736531818

Manufacturer: Husqvarna Equipment

Husqvarna 593446401 Longopac Dust Bags 4 x 20 Meter Rolls Extra-Strong 70 Micron

Genuine Husqvarna OEM Part Number: 593446401

Formatted Part Number: 593 44 64-01

GTIN: 7391736531818

Package Quantity: Four continuous bag liners

The Husqvarna 593446401 Longopac dust bag pack provides a convenient continuous-liner system for collecting and disposing of concrete dust, grinding debris, and other dry material from compatible Husqvarna dust extractors and separators. Each package contains four extra-strong, 20-meter continuous bag liners. The operator determines the length of each individual disposal bag, allowing smaller or larger bags to be created according to the material being collected.

Product Features

- Genuine Husqvarna Longopac continuous dust bag system
- Includes four 20-meter-long bag liners
- Extra-strong approximately 70-micron polyethylene construction
- Allows the operator to create custom-size disposal bags
- Helps contain concrete dust and dry debris during disposal
- Bags can be sealed before being separated from the continuous liner
- Reduces direct contact with collected dust and debris
- Compact replacement rolls are easy to store and transport

Longopac continuous dust collection liners

>

Quantity
Four rolls per package

Length
20 meters per roll, approximately 65.6 feet

Total Liner Length
80 meters, approximately 262 feet

Material Thickness
Approximately 70 microns

Material
Extra-strong polyethylene

GTIN
7391736531818

What Is Included?
One package containing:

- Four Husqvarna Longopac continuous dust bag rolls
- Each roll measures approximately 20 meters or 65.6 feet long

Please note: The dust extractor, Longopac cassette, bag ties, grinder, hose, and other accessories are not included unless specifically stated elsewhere in the product options.

How the Longopac System Works

- Pull the desired amount of bag material down from the Longopac cassette.
- Seal the liner below the collected material.
- Seal the liner again above the filled portion.
- Cut between the two sealed areas.
- Remove the sealed bag while leaving the remaining liner ready for continued use.

This continuous-liner design allows the dust extractor to remain substantially closed during bag changes and helps reduce unnecessary dust release.

Equipment Compatibility

>

This bag package is intended for equipment equipped with the compatible Husqvarna Longopac Mini continuous-bag cassette.

Longopac systems are used on multiple Husqvarna dust extractors, pre-separators, and related dust-management products. However, Husqvarna offers more than one Longopac bag size and thickness.

Important: Match the manufacturer part number on your existing bag package or consult your equipment parts manual before ordering. Do not order based solely on the appearance of the bag or dust extractor.

Why Use Genuine Husqvarna Longopac Bags?

Properly sized continuous liners fit the machine's bag cassette correctly and help maintain reliable dust containment. Bags that are too narrow, too wide, too thin, or made for another cassette may not feed, seal, or remain attached correctly.

Frequently Asked Questions

How many rolls are included?

This package contains four continuous Longopac bag rolls.

How long is each roll?

Each roll is approximately 20 meters or 65.6 feet long.

Are these individual dust bags?

No. These are continuous bag liners. The operator pulls down the desired length and creates individual disposal bags as needed.

How many disposal bags can one roll make?

The number varies according to the length of each bag. Shorter bags provide more individual disposal bags, while larger quantities of debris require longer bags.

Does this package include the Longopac cassette?

No. This listing is for the replacement bag liners only. The cassette and dust extractor are sold separately.

Will these fit every Husqvarna dust extractor?

No. Husqvarna uses different Longopac configurations. Verify part number 593446401 in your equipment manual or compare it with the number on your existing package before ordering.

Can these bags be used for hazardous dust?

The bags are intended to help contain collected material, but safe handling depends on the dust, the extractor, the filtration system, sealing procedures, personal protective equipment, and applicable workplace regulations. Follow the equipment manufacturer's instructions and all applicable safety requirements.

Ordering Reminder: Electrical parts, filters, bags, hoses, and accessories can look similar while having different sizes or applications. Please verify Husqvarna part number 593446401 before placing your order.
