Brand new genuine OEM replacement part

Quantity Supplied

One belt

Compatible Equipment

>

- Husqvarna / Blastrac 1-8DPS30 shot blaster
- Blastrac BDC-66 dust collector
- Blastrac BDC-99M dust collector

Important: Model names alone may not be sufficient to confirm compatibility. Some machines use different belts depending on production date, voltage, motor configuration or serial number.

Before Ordering

Please confirm all three of the following before placing your order:

- The equipment model number
- The equipment serial number
- OEM part number 533960501 in your machine's parts manual

For the 1-8DPS30, this belt is identified as the new-style version for machines beginning with serial number 9438B and higher. Do not order by appearance or belt dimensions alone.

What You Receive

- One Husqvarna 533960501 Poly-V drive belt

No pulleys, bushings, belt guards, mounting hardware or additional belts are included unless specifically stated elsewhere in the order.

Installation Notes

Inspect the pulleys, taper-lock bushings and belt alignment before installing the replacement belt. Worn or misaligned pulleys can cause premature belt wear. Belt replacement and tensioning should be performed by a qualified equipment service technician.

Some equipment assemblies may use more than one belt. Confirm the required quantity in the applicable illustrated parts list before ordering.

Frequently Asked Questions

Is this an aftermarket belt?

No. This listing is for genuine Husqvarna OEM part number 533960501.

Will it fit every Blastrac 1-8DPS30?

No. This is the new-style belt identified for applicable 1-8DPS30 machines from serial number 9438B and higher. Verify the parts diagram for your exact machine.

Does the listing include two belts?

No. The advertised price is for one belt. Certain assemblies may require two belts, so review your machine's parts manual before ordering.

Can I match the belt by size?

Ordering by belt measurements alone is not recommended. Confirm OEM part number 533960501 using the machine model and serial number.

Display images are provided for general identification. Products are fulfilled according to the manufacturer part number ordered. Specifications and part applications are subject to manufacturer changes without notice.
