water lift than single-motor units, improving moisture recovery and dry times across both carpet and hard floor surfaces. The machine-only listing (05-10012) ships without wand, hose, or tools — intended for contractors who own compatible extraction equipment and want the Neptune 1200 body only.

The Neptune 1200's multi-surface capability makes it a single-machine solution for commercial facilities where both carpet and hard flooring are present — a common configuration in hotels (corridors and rooms: carpet; lobbies and restrooms: tile), schools (classrooms: carpet tiles; hallways and cafeterias: VCT or tile), and healthcare facilities. The dual vacuum system lifts moisture from both surfaces, though hard surface extraction through a rotary tool like the Revolver XP (available in the 05-10012-P package) produces the most thorough results on tile and grout. The Neptune 1200 is positioned above the Neptune 500H in the US Products line, with higher-capacity tanks and a larger body suited to commercial contractors running full-shift cleaning operations.

The 05-10012 (machine only) requires a separately ordered wand and hose for operation. The 05-10012-P includes the Revolver XP Hard Surface Tool and 25-foot hose set for complete out-of-the-box operation. Order 05-10012 if you have existing US Products wands; order 05-10012-P for a complete new setup.
Specification

Model / SKU
Neptune 1200 Cold / 05-10009-005

Extractor Type
Commercial extractor

Heater
None

Vacuum System
Dual 3-Stage Vacuums

Pump
400 - 1,200 PSI
