Model Number: 111355

Legend Brands 111355 Condensate Pump 115V 80 GPH for Dri-Eaz 2800i 3500i Dehumidifiers
Replaces 08-01731

Manufacturer: Drieaz

Legend Brands 111355 Dri-Eaz Condensate Pump 115V 80 GPH with Cord and Connector for LGR 2800i and LGR 3500i

Genuine Legend Brands OEM replacement condensate pump assembly for select Dri-Eaz LGR dehumidifiers. This 115-volt centrifugal pump removes collected condensate water from the dehumidifier and includes the attached electrical cord and connector for installation.

Legend Brands Part Number: 111355

Previous Part Number: 08-01731

Factory Description: Pump & Deepwell Centrifugal, 115V, 80 GPH, Cord with Connector

Application: Dehumidifier condensate removal

Condition: Brand new OEM service part

Compatible Dri-Eaz Dehumidifiers

- Dri-Eaz LGR 2800i & Model 110128 / F410
- Dri-Eaz LGR 3500i & Model 110133 / F411

Important: Please verify the equipment model and the part number printed on your original pump before ordering. Compatibility should not be determined by appearance alone. Electrical and plumbing connections may look similar on pumps designed for different machines.

Product Features

- Genuine Legend Brands replacement part
- Designed for Dri-Eaz LGR 2800i and LGR 3500i dehumidifiers
- 115-volt centrifugal condensate pump assembly
- Rated at approximately 80 gallons per hour
- Includes attached electrical cord and connector
- Direct replacement for former part number 08-01731
- Restores automatic condensate-water removal

What You Receive

One Legend Brands 111355 centrifugal condensate pump assembly with attached cord and electrical connector, as supplied by the manufacturer.

Only the components included by Legend Brands with part number 111355 are supplied. Hoses, clamps, check valves, brackets, switches, mounting hardware and other dehumidifier components are not included unless packaged with the pump by the manufacturer.

What This Pump Does

During dehumidifier operation, moisture removed from the air collects as liquid condensate. The condensate pump transfers this water out of the machine through the drain hose so the dehumidifier can operate continuously without requiring a

>

collection tank to be emptied manually.

A failed, restricted or disconnected condensate pump may cause poor drainage, water accumulation inside the machine, repeated pump errors or automatic shutdown.

Before Replacing the Pump

Before ordering a replacement pump, inspect the complete condensate-drain system for:

- Kinked or restricted drain tubing
- Debris or buildup in the pump reservoir or tubing
- A blocked or defective check valve
- A loose electrical connector
- A damaged drain hose
- Improper hose routing or excessive discharge height
- A defective pump microswitch or related control component

The pump may not be the cause of every drainage problem. Proper diagnosis before ordering can prevent unnecessary replacement.

Installation Notice

Disconnect the dehumidifier from electrical power before servicing. Installation should be completed by a qualified service technician familiar with electrical appliances, condensate pumps and refrigeration equipment.

Route all tubing and wiring in the same position as the original installation. Confirm that hoses are fully seated, clamps are secure, electrical connections are dry and the drain line is not pinched before operating the machine.

Frequently Asked Questions

Is part 111355 an OEM pump?

Yes. This is a genuine Legend Brands service part intended for compatible Dri-Eaz equipment.

What older part number does it replace?

Legend Brands part 111355 replaces or supersedes former part number 08-01731.

Does it fit both the LGR 2800i and LGR 3500i?

Yes. Factory parts information identifies this pump for the Dri-Eaz LGR 2800i model 110128/F410 and LGR 3500i model 110133/F411.

Is this a complete dehumidifier drain system?

No. This listing is for the condensate pump assembly identified as part number 111355. Drain tubing, check valves, switches, brackets and other components are sold separately unless specifically shown and stated as included.

Can I return the pump after installing it?

Electrical and service parts generally cannot be returned after installation, connection, testing or use. Verify the model, voltage, part number and diagnosis before ordering.

Ordering Verification

For the most accurate parts identification, provide the complete model number and serial number from the dehumidifier data label. Manufacturing changes may occur within the same general model family.

Manufacturer

Legend Brands / Dri-Eaz
