Model Number: SDP0106001

Used DriStorm And Suntec Dehumidifier SDP0106001 Replacement Ambient Temperature Sensor 15620515

Manufacturer: Clean Storm

Used DriStorm / Suntec SDP0106001 Ambient Temperature Sensor
Replacement ambient temperature sensor for select DriStorm and Suntec commercial dehumidifiers. This sensor monitors the surrounding air temperature and sends temperature information to the dehumidifier control system.
Product Information

Part Number
SDP0106001

Part Type
Ambient temperature sensor

Application
Commercial dehumidifier replacement part

Condition
New replacement component

Known Model Compatibility

- DriStorm commercial dehumidifiers Temperature Sensor for DriStorm134 / 184 , AOne70-L and AOne-90L Dehumidifiers
- Suntec SD800
- Suntec SD801
- Suntec SD1000
- Suntec SD1001

Compatibility Notice: Dehumidifier components may vary by model revision and production date. Confirm that your original sensor, wiring connection, and part number match SDP0106001 before ordering. Purchase is fulfilled according to the part number shown in this listing.

Possible Symptoms of a Failed Temperature Sensor

- Incorrect or unstable ambient-temperature reading

>

- Dehumidifier displays an unexpected temperature-related fault
- Unit does not respond correctly to changing room temperatures
- Control panel displays an unrealistic temperature value
- Sensor wiring or connector is visibly damaged

These symptoms can also be caused by damaged wiring, loose electrical connections, or a control-board problem. Troubleshoot the machine before replacing electrical components.

Installation Notes

- Disconnect the dehumidifier from electrical power before servicing.
- Photograph the original sensor location and wire routing before removal.
- Inspect the connector and adjoining wiring for corrosion, looseness, or heat damage.
- Install the replacement sensor in the same position as the original component.
- Secure the wiring away from the fan, compressor tubing, sharp edges, and moving components.
- Reassemble the machine and test the displayed ambient temperature.

Included: One SDP0106001 ambient temperature sensor with attached wiring and connector, as pictured.

Not Included: Control board, display panel, dehumidifier, mounting hardware, or other repair parts unless specifically shown.

Important Ordering Information

Please inspect your original part and confirm the machine model before ordering.

Product photographs help identify the component, but the manufacturer part number is the primary method used to fulfill the order.

Electrical service should be performed only by a qualified technician. Disconnect all power before opening or servicing the machine. Specifications, appearance, and wire markings may change without notice.

DriStorm And Suntec Dehumidifier SDP0106001 Replacement Ambient Temperature Sensor

Used on all DriStorm Dehumidifiers and Suntec Models SD800, 801, 1000, 1001

Ambient Temperature Sensor
Air Temperature Thermistor
DriStorm Sensor
Suntec SD800 Sensor
SD801 Temperature Sensor
SD1000 Thermistor
SD1001 Ambient Sensor
Dehumidifier Temperature Probe
NTC Temperature Sensor
Replacement Temperature Senso
