Damtech D67100kit, Repair Kit for K167 Hand Valve, Rebuild Kit

Manufacturer: Damtech

Damtech D67100kit, Repair Kit for K167 Hand Valve, Rebuild Kit

Description

Restore peak performance and eliminate costly leaks with the Damtech D67100kit Valve Repair Kit. Engineered explicitly as the direct replacement service kit for the K167 Hand Valve, this package provides all the essential internal components needed to rebuild your valve instead of replacing the entire assembly.

Ideal for commercial carpet cleaning wands, upholstery details tools, and portable extractors, this kit stops leaks at the trigger, restores positive shut-off control, and ensures proper pressure management during high-PSI operations.

- **Premium Plunger Stem:** Features a durable, precision-machined stainless steel stem configuration for ultimate rust resistance and longevity.
- **Heavy-Duty Spring:** High-tension stainless steel spring ensures crisp, immediate trigger snap-back and reliable shut-off functionality.
- **Chemical-Resistant O-Rings:** Includes premium Viton O-rings designed to withstand the harsh heat and concentrated chemicals typical of professional extraction.
- **High-Grade Gasket:** Includes a specialized Teflon sealing disc to deliver a flawless, high-pressure seal.

Included

- (1) Stainless Steel Plunger Stem with pre-installed Viton O-Ring
- (1) Heavy-Duty Replacement Return Spring
- (1) Outer Viton Sealing O-Ring
- (1) Teflon Gasket Washer
