B and G 2384, Nozzle Assembly for Flex-A-Lite 2600 Fogger

Manufacturer: B and G Equipment Co

B and G 2384, Nozzle Assembly for Flex-A-Lite 2600 Fogger  
Description

The B&G 2384 Nozzle Assembly is the authentic, factory-original complete replacement nozzle assembly for the industry-standard B&G Flex-A-Lite 2600 Series ULV Cold Fogger. It serves as a vital component to maintain precision flow control and ultra-low volume (ULV) droplet distribution during intensive pest control, disinfection, and odor remediation applications.

Specifications

Product Name: B&G 2384 Nozzle Assembly

Manufacturer: B&G Equipment Company (Pelsis Group)

Part Numbers: Model 2384 | Computer SKU 29108246

UPC: 1208001380

Shipping Weight: 0.21 lbs

Equipment Compatibility: Engineered exclusively for B&G Flex-A-Lite 2600 series foggers (110V and 220V models).

Material Composition: Chemical-resistant, heavy-duty composite designed to withstand corrosive water-based and oil-based formulations.

## Key Features & Benefits

**Complete Turnkey Solution:** Ships as a fully consolidated assembly including the internal venturi structure, flow control threading, and casing.

**Variable Micronic Output:** Fully supports the Flex-A-Lite 2600's signature performance profile, translating from an invisible ULV aerosol (20&ndash;35 microns) to a heavy power mist (56 microns).

**Precision Flow Regulation:** Enables the fogger's adjustable metering system to seamlessly scale delivery speed from 0.33 to 2.5 fluid ounces per minute.

**Leak Mitigation:** Restores factory-grade pressure sealing at the tip of the 18-inch, 36-inch, or 48-inch flexible extension hoses, protecting your system's 2-stage motor from fluid backflow.
