Fits Hydro-Force MB07 Vapor Cleaning 3000

This replacement detail nozzle is designed for use with the Hydro-Force MB07 Vapor Cleaning 3000 Steam Cleaner.

The MB07 is a commercial vapor steam cleaning machine that heats water to approximately 250 degrees F and uses interchangeable accessories for different cleaning applications.

The original MB07 accessory package includes both 1-hole and 3-hole detail nozzle attachments. Part number 123434 is the 1-hole version.

Why Use a 1-Hole Detail Nozzle?

A single-hole nozzle concentrates the steam output into a smaller area than a multi-hole attachment. This makes it useful for precision cleaning and areas where a focused stream of steam is preferred.

Typical applications may include:

- Tile and grout detail cleaning
- Bathroom fixtures and edges
- Commercial kitchen detail cleaning
- Crevices and corners
- Equipment and machinery detail cleaning
- Areas around hardware and fixtures
- Other hard-surface detail cleaning applications

What's Included?

- Qty 1 - Hydro-Force 123434 1-Hole Detail Nozzle

What's NOT Included?

- Hydro-Force MB07 steam cleaning machine
- Steam hose or handle assembly
- Detail brushes
- 3-hole detail nozzle
- Floor brush or extension tubes
- Other accessories shown for reference

Please Note: Product photographs may show related equipment or accessories for fitment and identification purposes. This listing is for one Hydro-Force 123434 1-hole detail nozzle only.

Verify your machine model and required nozzle configuration before ordering.
