Model Number: S1530-DBL

PMF S1530-DBL, 40in, Double Bend, Stair, Carpet Cleaning Wand, 9-3/4in, 2 Jet, 1000 PSI.
Stainless Steel 1.5 Inch Pipe

Manufacturer: Production Metal Forming

PMF S1530-DBL 40-Inch Double-Bend Stair Carpet Cleaning Wand

PMF Part Number: S1530-DBL

Tool Length: 40 Inches

Pickup Head Width: 9-3/4 Inches

Wand Design: Double Bend

Spray Design: Open Spray

Spray Jets: Dual Jets

Maximum Pressure: 1,000 PSI

Valve: PMF V1-EZ Forged-Brass Valve

Construction: Stainless Steel

Quick Disconnect: QD40 Sold Separately

PROFESSIONAL 40-INCH DOUBLE-BEND STAIR AND DETAIL CARPET
EXTRACTION WAND WITH A 9-3/4-INCH STAINLESS-STEEL HEAD, DUAL
SPRAY JETS AND 1,000 PSI PMF V1-EZ FORGED-BRASS VALVE.

The PMF S1530-DBL Double-Bend Stair Tool is a professional carpet extraction wand designed for cleaning carpeted stairs, underneath beds and furniture, underneath desks, around obstacles and in other difficult-to-reach carpeted areas.

Unlike a conventional straight or single-bend stair wand, the S1530-DBL incorporates a double-bend stainless-steel tube configuration. The additional bend near the cleaning head helps position the pickup head underneath furniture and other low-clearance areas while allowing the operator to remain in a more comfortable working position.

At approximately 40 inches tall, the S1530-DBL provides substantially more reach than a conventional short stair or upholstery tool. Its 9-3/4-inch stainless-steel pickup head provides a wide cleaning path for carpeted stair treads and detail-cleaning applications.

Double-Bend Wand Design

>

The defining feature of the S1530-DBL is its double-bend tube geometry. PMF designed the bend near the head to help the wand reach underneath objects where a conventional stair tool or straight wand can be difficult to position.

This configuration makes the S1530-DBL especially useful for:

- Carpeted stair treads
- Cleaning underneath beds
- Cleaning underneath desks and tables
- Reaching underneath furniture
- Cleaning around obstacles and confined areas
- Residential and commercial carpet-detailing work

9-3/4-Inch Stainless-Steel Cleaning Head

The S1530-DBL uses a 9-3/4-inch-wide stainless-steel pickup head. The wider head allows the technician to cover substantially more carpet with each pass than a conventional 4-inch or 6-inch stair tool.

The wand uses an open-spray dual-jet configuration. Two spray jets distribute cleaning solution across the cleaning path before the stainless-steel vacuum head extracts the cleaning solution, soil and moisture from the carpet.

PMF V1-EZ 1,000 PSI Forged-Brass Valve

The PMF S1530-DBL comes standard with the PMF V1-EZ forged-brass solution valve and is rated for pressures up to 1,000 PSI. This makes the tool suitable for use with professional portable carpet extractors and truckmount carpet-cleaning systems operating within the tool's pressure rating.

A padded assist handle gives the operator a second gripping point for improved control and leverage while cleaning stairs or maneuvering the wand underneath furniture.

PMF S1530-DBL Features

>

- 40-inch professional stair and detail carpet extraction wand
- Double-bend tube design
- Double bend at the head helps the wand reach underneath furniture
- 9-3/4-inch-wide stainless-steel pickup head
- Open-spray cleaning design
- Dual spray jets
- PMF V1-EZ forged-brass solution valve
- Maximum operating pressure of 1,000 PSI
- All-stainless-steel construction
- Padded adjustable assist handle
- Long handle reduces the need to work from a kneeling position
- Suitable for stairs and difficult-to-reach carpeted areas
- Professional carpet-cleaning equipment
- Made by Production Metal Forming / PMF

PMF V1-EZ Forged Brass

Construction
Stainless Steel

Assist Handle
Padded

Quick Disconnect
QD40 Sold Separately

Why Choose the S1530-DBL?

The S1530-DBL combines the reach of a long-handle stair wand with a specialized double-bend design that makes it particularly useful when cleaning underneath furniture and other obstructions. Its wide stainless-steel head, dual jets and professional 1,000 PSI forged-brass valve make it suitable for technicians who need more productivity and reach than a conventional short stair tool provides.

Important: PMF factory photographs may show this tool equipped with a QD40 quick disconnect. The QD40 quick disconnect is not included with the standard S1530-DBL and must be purchased separately if required.
