Karcher 6.365-493.0 Set of gaskets high-pressure W1 GTIN 4039784287174

Model Number: 6.365-493.0

Karcher 6.365-493.0 Set of gaskets high-pressure W1 GTIN 4039784287174

Manufacturer: Karcher Pressure Washing

Karcher 6.365-493.0 W1 High-Pressure Gasket Set
Reference illustration. Confirm actual contents and fitment by part number.

Service the high-pressure sealing section of your compatible Kärcher pump with the specified W1 gasket set. Part number 6.365-493.0 is identified in Kärcher parts diagrams as a high-pressure gasket set for selected pressure washer pump assemblies.
This is a pump service part. Match the part number to your machine's parts diagram before ordering.

Product Identification

Brand
Kärcher / Karcher

Manufacturer part number
6.365-493.0

Number without punctuation
63654930

Factory description
Set of gaskets high-pressure W1

GTIN / EAN
4039784287174

Order unit
One gasket set; order the quantity specified in your parts diagram

Application

Steambrite Supply

Karcher 6.365-493.0 Set of gaskets high-pressure W1 GTIN 4039784287174

High-pressure sealing section of specified Kärcher pressure washer pumps

Check Quantity Before Ordering
The Kärcher HD 9/18-4 Cage *KAP, machine number 1.367-321.0 parts list specifies three sets of 6.365-493.0 for its cylinder-head assembly. One ordered set should not be assumed to service all three plungers. Other models and revisions must be checked individually.
Fitment and Replacement Information
Current replacement check: A newer Kärcher HD 6/11-4 Cage Contractor *KAP cylinder-head parts list identifies 6.365-493.3 as the replacement for 6.365-493.0. Confirm the currently supplied part number and compatibility with Steam-Brite before placing your order.
Machine names alone do not establish compatibility. Supply your machine model, full machine number, serial number and the relevant parts-diagram position when requesting assistance.

- Verify that your diagram calls for W1 high-pressure seals.
- Check how many gasket sets the repair requires.
- Check whether low-pressure W2 seals, valves, O-rings or other service parts must be ordered separately.
- Use the applicable factory service instructions for assembly and installation.

What This Listing Covers
This listing is for the specified high-pressure gasket set. It is not a complete pump, cylinder head or complete pump rebuild kit. Do not assume that separately numbered low-pressure seals, valves or O-rings are included.
Ordering and Shipping
Online availability for purchase does not confirm stock at the Steam-Brite San Antonio warehouse. Contact Steam-Brite to confirm availability, the supplied part number and estimated shipping time if your repair is urgent.
