Included!

Xpower P-80A-Blue 600 CFM Mini Air Mover 1.2 Amp 120 Volts 3 Speed w Power Outlet GTIN: 848025011010

Description
Chemical residues which cause re-soiling can be removed instantly. The large lift off recovery tank also lets you extract more spots before emptying. And talk about power. The vacuum motor is strong enough to extract spots using an optional light weight floor wand. It's also compact and easy to maneuver. Spot the difference for yourself.

The US Products Cobra Mini 750H is a purpose-built heated spot extractor weighing 32 lbs, with a 750W inline heater, 95 CFM airflow, 85″ water lift, and 55 PSI solution pump. At 21″ × 12″ × 31″, it fits in a standard cargo van without a ramp. The 05-10020-006 machine-only SKU ships without wand or hose for operators adding to an existing tool inventory

Auto detailing extraction is the primary use case for the 750H — vehicle interiors accumulate skin oils, food grease, and protein-based soils in seat fabric and carpet that cold water cannot fully emulsify. The 750W inline heater raises solution temperature at the wand tip, activating cleaning chemistry and releasing bonded soils that ambient-temperature extraction leaves behind. On upholstered furniture restoration, heated extraction accelerates dry times by delivering drier steam-temperature solution rather than room-temperature water.

The 2.5-gallon recovery tank holds more water than the 2.2-gallon solution tank feeds per fill cycle, so a single fill of solution to the fill line will not overflow the recovery side under normal use. The float shut-off automatically cuts vacuum when the recovery tank reaches capacity, protecting the motor from running against a full tank. On sustained upholstery extraction jobs, plan to empty the recovery tank every 2–3 fill cycles depending on carpet moisture content.
