Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

Model Number: 20261338

Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

Manufacturer: Steambrite MFG

SteamBrite 20261338 3/8" Reusable Hose Repair End – Single-Wire Hose x 3/8" Male NPT

Repair a compatible 3/8" inside-diameter single-wire braided pressure hose with a reusable, field-attachable hose end. The straight 3/8" male pipe connection attaches to matching female pipe fittings, while the threaded socket and insert secure the fitting to an approved hose without a hydraulic crimper.

A practical repair option for compatible pressure-washing hose assemblies.

Confirm the hose model, outside diameter, operating pressure and temperature before selecting or installing a replacement end.

Product Specifications

Steambrite Part Number
20261338

Hose Inside Diameter
3/8" nominal – dash size -6

Connection
3/8" male NPT pipe thread – 18 threads per inch

Configuration
Straight, rigid male pipe hose end

Hose Construction
Compatible single-wire braided pressure hose; verify the specific hose and fitting combination

Attachment Style
Reusable / field attachable; threaded socket and insert

Parts & Accessories > Hoses > Repair Hoses > Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

Crimping Equipment
Not required

Part Numbers Associated with This Listing

This product is listed under 20261338, with existing comparison references 8.705-497.0, 87054970, 7269961061, and G27100-0606. Confirm the required specification when replacing an existing fitting.
Reusable Hose End Cross-Reference Guide
The following catalog numbers identify comparable 3/8" hose x 3/8" male pipe reusable fittings. Each fitting must be used with its approved hose. A matching nominal size does not establish universal interchangeability.

Brand / Supplier	Comparison Part Number	Catalog Application

Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

603R-1

Reusable male NPTF fitting for specified 100R1 thin-cover hose.

Fairview

SRT125-6C

Steel reusable male pipe fitting for SAE 100R1AT hose.

Future Hydraulik

31128-06-06

100R1AT male NPT fitting; uses R310-06 ferrule and R128-06-06 insert.

Discount Hydraulic Hose

R1-06-106

Reusable male NPTF fitting listed for SAE 100R1AT hose.

Tecalemit

2125059 insert

+ 2124643 socket

Separate components for T111 1SN / 100R1AT hose; designation R 10 NM 3/8" 18.

Brand names and part numbers are provided for product identification and comparison. They do not identify the manufacturer of the item supplied or establish approval for mixed-brand hose assemblies.

Additional Numbers Requiring Hose-Specific Verification

- Aeroquip / Danfoss FC7985-0606S: same nominal hose and pipe sizes; the current manufacturer listing specifies GH663 hose. Do not assume compatibility with other single-wire hoses.
- Parker 20130-6-6: same nominal connection sizes, but the 30 series catalog specifies Parker 302 hose. It is a separate fitting system from the 42 series.

Check Fit Before Ordering

- Confirm the hose has a 3/8" inside diameter and the required single-wire construction.
- Check the hose brand, model, outside diameter and cover specification against

Parts & Accessories > Hoses > Repair Hoses > Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

Steambrite 20261338 Reusable Hose Repair End 3/8in Mip X 3/8inID Single Wire Braided Pressure Hose 8.705-497.0 G27100-0606

the fitting manufacturer's requirements.

- Confirm that the equipment connection requires 3/8-18 male NPT/NPTF pipe thread.
- Verify the completed assembly's pressure, temperature and fluid compatibility for the intended application.
- Use a matched socket and insert from the approved fitting system.

Installation Information

Follow the assembly instructions for the exact hose and fitting supplied. Correct hose preparation, lubrication, insertion and assembly inspection are essential. A repair fitting does not restore damaged hose reinforcement.

View the Gates field-attachable coupling assembly guide (PDF) — use this guide only when applicable to the fitting and hose being assembled.

Frequently Asked Questions

Do I need a hose crimper?

No. This is a threaded, field-attachable fitting. Follow the applicable assembly instructions for the required tools and installation procedure.

Will it fit every 3/8" single-wire hose?

Compatibility depends on more than inside diameter. Hose outside diameter, cover thickness, construction and manufacturer approval must also match.

Can I use a two-wire or R5 fitting instead?

Only if the manufacturer specifically approves that fitting for the exact hose. R1, R2 and R5 fitting systems should not be treated as interchangeable, but usually NO.

What does 3/8" male pipe mean?

It is the nominal pipe connection size, not the measured outside diameter of the threads. The connection in this comparison guide is 3/8-18 male pipe.

Reusable Hose Repair End for 3/8" Mip X 3/8" ID Single Wire Braided Pressure hose 7269961061

Fix pressure washing hoses in the field.

"Field" Attachable Coupling Hose Repair

Applications:

- Design and build your own hose or adapt and repair hose in the field (no crimper required)
- For 1 wire braid hose

Specifications:

- 3/8" ID x 3/8" MPT
